where should the united states focus its long term efforts to improve the nation's environment what are the nation's most important environmental issues what role should science and technology play in addressing these issues linking science and technology to society's environmental goals provides the current thinking and answers to these questions based on input from a range of experts and interested individuals including representatives of industry government academia environmental organizations and native american communities this book urges policymakers to use social science and risk assessment to guide decisionmaking monitor environmental changes in a more thorough consistent and coordinated manner reduce the adverse impact of chemicals on the environment move away from the use of fossil fuels adopt an environmental approach to engineering that reduces the use of natural resources substantially increase our understanding of the relationship between population and consumption this book will be of special interest to policymakers in government and industry environmental scientists engineers and advocates and faculty students and researchers

celebrates the creativity of humanity by examining the history of technology as a strategy to solve real world problems

as insightful and wise today as it was when originally published in 1954 jacques ellul s the technological society has become a classic in its field laying the groundwork for all other studies of technology and society that have followed ellul offers a penetrating analysis of our technological civilization showing how technology which began innocuously enough as a servant of humankind threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends no conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book a magnificent book he goes through one human activity after another and shows how it has been technicized rendered efficient and diminished in the process harper s one of the most important books of the second half of the twentieth century in it jacques ellul convincingly demonstrates that technology which we continue to conceptualize as the servant of man will overthrow everything that prevents the internal logic of its development including humanity itself unless we take necessary steps to move human society out of the environment that technique is creating to meet its own needs the nation a description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception subverting and suppressing these values to produce at last a monolithic world culture in which all non technological difference and variety are mere appearance los angeles free press

this comprehensive handbook gives a fully updated guide to lasers and laser systems including the complete range of their technical applications the first volume outlines the fundamental components of lasers their properties and working principles the second volume gives exhaustive coverage of all major categories of lasers from solid state and semiconductor diode to fiber waveguide gas chemical and dye lasers the third volume covers modern applications in engineering and technology including all new and updated case studies spanning telecommunications and data storage to medicine optical measurement defense and security nanomaterials processing and characterization

run time 26 minutes

recent technological innovations have elicited controversy over their effects on society the authors debate whether technology has benefited society and how it will affect society in the future chapters include has technology harmed society are technological advances in medicine beneficial how has technology affected privacy how will technology affect society in the future

read any newspaper or watch your television and as often as not you will be confronted by the worries hopes challenges and

mistakes of science and technology sociology has been trying to make sense of science for many years while government and industry have promoted and exploited it for even longer but what are science and technology how have they been shaped by society what new directions are they taking andrew webster provides a lively and accessible introduction to the sociological analysis of science and technology exploring contemporary debates in a comprehensive and balanced fashion and showing how the findings of sociologists of science relate to important issues of science policy and politics biotechnology and genetic engineering technology transfer feminist and radical critiques of science big science projects science parks and research within private industry are some of the topics that provide the focus for a wide ranging critical yet constructive sociological discussion science technology and society will be of particular value to students academics and practitioners involved in studying and helping to shape these two very powerful institutions of society
